

Playflex™ CBI
Rubber Play Tiles

**For the sake of better performance,
we've dispensed with a lot:**

a lot of weight.

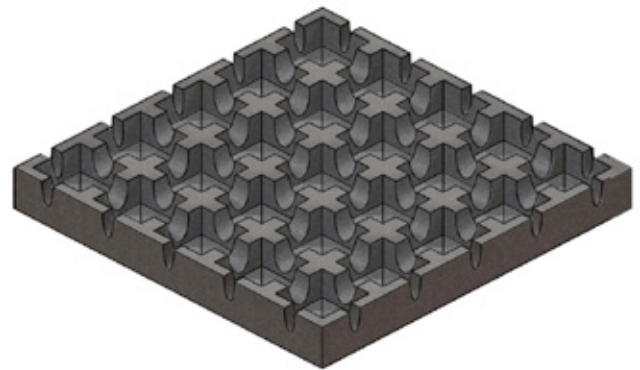

Introducing a new play tile from your trusted ISO 9001:2008 certified manufacturer and supplier: Rephouse.

The CBI Play Tile has been computer generated and engineered and methodically evaluated and tested, to offer high level fall cushioning for any play environment whether outdoors or indoors.

The complex underbody has been distinctly engineered, providing superior fall protection as well as excellent water drainage.

Due to its high compression design, the CBI play tile is stronger with a longer life span. The tile is lighter as well, saving on freight and making installation easier.

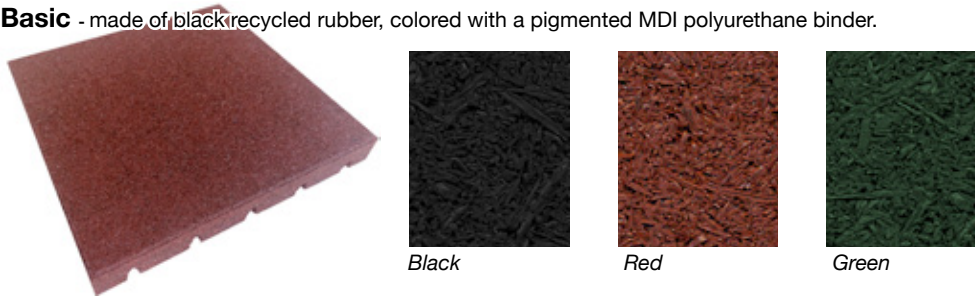

Installation is quick using Rephouse's unique ADU-5 automated adhesive dispensing unit whilst also saving substantially on adhesive consumption.

Underside CBI Play Tile

| CBI Play Tile | Critical Fall Height EN 1177:2008 | Critical Fall Height ASTM F1292:2008 |
|----------------------|--------------------------------------|---|
| 45 mm (1 3/4") | 1.3 m | 3' |
| 50 mm (2") | 1.7 m | 5' |
| 65 mm (2 1/2") | 2.1 m | 6' |
| 85 mm (3 1/3") | 2.7 m | 8' |
| 105 mm (4 1/8") | 3.3 m | 11' |

Basic - made of black recycled rubber, colored with a pigmented MDI polyurethane binder.
