Design your own.

If you don't see a standard Neoflex™ color you like, you can always try Think Color™ to create one of your own. Think Color™ is Rephouse's fully interactive floor design web tool built to bring infinite design options straight to your computer screen. Think Color™ allows you to select a custom color palette, and blend colors at the ratios you desire. It's simple to use, allowing you to experiment with creating unique designs that you can print, save and request samples. Instruct us to make your floor just the way you want it!

Create your own blend of colors and chip sizes to suit the exact application, atmosphere and texture you have in mind. Or consult your Rephouse partner who'll be happy to assist you selecting and designing something to your exact specification.

Visit www.rephouse.com/thinkcolor/preloader.html to give it a try!
